

# ENRICH THE LIVES OF YOUR STUDENTS AND OUR ANIMALS

It is our mission to advocate for animals in need and put them at the forefront of everything we do. Providing a better future for unwanted pet animals by rescuing, rehabilitatating, and rehoming them. To work with our local community to educate and run community projects that ensure animals' needs are understood and met. Only then can we hope to give animals a second chance at a better life.

We deliver tailored educational packages in a practical, indoor and outdoor setting and help students to develop appropriate, transferrable skills to help them flourish. We show students the skills to look after and respect the animals as well as interacting with them and becoming aware of behaviors and how to act accordingly.

These sessions are led by our Centre supervisor who has a teaching degree and is used to working in a student environment. She is also a highly qualified member of the team.

We are thrilled that you would like to work with us on our enrichment programme. These sessions can be adapted for your specific needs to make sure each young person gets a fulfilling experience. All students must be supervised by school staff at all times while on site.
